Lakeview • 6,455 square feet

Have you ever experienced house envy? It's that troubling emotion when you step into a perfectly executed home. Fortunately, the designers at PineRidge Timberframe must be familiar with that feeling, since they incorporated everything you yearn for into the Lakeview. An open great room, dining area and kitchen are subtly separated with a fireplace, while a sunroom provides a respite from the social spaces. Rounding out the first level is a spectacular two-story master suite, complete with two walk-in closets and en suite bathroom. In the walkout basement, you'll find a family room and adjoining pool room, a full bath and a spa. A guest suite on the second level will make envious visitors want to move in. And the smartest amenity of all? Built-in bonus rooms so your home can change with your lifestyle.
